

GOOD ADVICE ABOUT YOUR NEW FENCE

Chamblee Fence wants your fence installation to be worry and problem free.
Please help us with the following.

1. Locate and clear the exact place of fence installation. Though there is no law, we recommend that you stay 6" inside the property line. Stake the fence corners with inexpensive twine and string out the entire fence line. This will give you an idea of how your fence will look and alert you to potential problems such as trees and shrubs in the way.
2. Access to water and electricity are required for most fence installations
3. Inform your neighbors of what you are doing. They normally will agree and even permit you to connect to their fence if you seek permission. A new fence can cause tension between neighbors when it comes as a surprise.
4. Locate utilities: Chamblee will call and have your main utilities such as phone, gas, power and cable located. They **will not** locate lines such as gas lines to lights and grills, sprinkler irrigation lines and low voltage lighting. We cannot be held responsible for what we hit with an auger machine or post hole digger. Please make your salesperson or installer aware of these lines to avoid problems.
5. Covenants and city or county laws are important to obey. Be sure to check in your community and your governing agency for such things as fence height, type, and location. The customer is responsible to meet these criteria.
6. City governments may require a permit. Be sure to inquire and comply. If a fence violates code, work will be delayed until you secure the necessary permitting.
